

Agribusiness

We have accomplished a historical average ROI of 9.36 to 1 at the end of 2023

Challenges in the industry

- Inflation in energy, raw materials and food
- Access to funding for infrastructure (co-investments)
- Labor force for the field and decrease in Ha available
- Access to specialized personnel and continuous training
- Focus on growing more organic food
- Access to "Agro 4.0" technology and experienced personnel in the use of "data analytics" and "predictivity"
- Regenerative agriculture and efficient and circular consumption processes (Without Waste)
- Access to financing and preferential negotiations with global providers
- Circular logistics at the cluster level (Training - Hibernate - Sowing - Harvest - Storage + Transformation - Export - Sale)
